HARD SKILLS

MAIN FEATURED SKILLS

Creation of complete systems from scratch, with scalability plans.

IT team leadership to create and develop digital products in an agile way.

Implementation of processes that improved operational efficiency.

PROFESSIONAL EXPERIENCE

DEVOPS/CLOUD COMPUTING — 2026 – Atual
OUT.CLOUD | Boavista, Porto Portugal

- **My Role:** Creation and maintenance of development and testing environments in AWS; Permissions configuration; Development of scripts in Bash and Python; Maintenance of CI/CD pipelines; Cost analysis of internal accounts and functionality testing; Writing technical documentation.
- **Objectives:** Automate the creation of environments; Implement tagging policies and budgets; Document the service deployment process.
- **How I Solved:** Problem found → investigation + decision → tool used (Terraform, Bash/Python script, CloudWatch) → measurable result → documentation.

LEADER PROJECT FULLSTACK — 2025 - 2026
HUELLATINA | Batalha, Porto Portugal

- **My Role:** Manage a multidisciplinary team (Design, Software Architecture and Development) and end-to-end management of digital projects.
- **Objectives:** Creation of a Hub and centralized operations center to support immigrants with their proper insertion and integration in Portugal.
- **How I Resolved:** I developed the architecture and scalable basis of the web system, trained the team and together we created tools and solutions to meet the Cooperative's demands, the total development was more than 70 pages, functional quality review of code and design and implementation of reports

FOUNDER DEVELOPER FULLSTACK — 2023 – 2025
